I build web systems, mobile apps and backend services on PHP and Laravel, from design to production. I have been developing since 2015, built and led a team as a CTO, and now work as a freelancer.

EXPERIENCE

OCT 2024 – PRESENT

Freelance web developer

Web shops and custom web systems, data synchronisation, development and system design consulting, audits.

FEB 2023 – OCT 2024

Chief Technology Officer, startup

Launched a startup in the Hungarian IT retail market: designed and built the system, a high-load SaaS (Laravel, PHP, NoSQL), automated processing of wholesaler data, server infrastructure, built and led the development team.

JAN 2021 – FEB 2023

Freelance web developer

Web shops, custom web and data synchronisation systems, design of an in-house product.

APR 2018 – JAN 2021

Web developer, car parts web shop

Site maintenance and new features, sync between the back-office system and the shops, development environment setup.

AUG 2016 – APR 2018

Sole trader

Custom applications and websites for Windows, Mac and mobile, AR/VR games, team coordination.

FEB 2015 – AUG 2016

Lead programmer, game studio

Computer and mobile games, AR/VR, leading the development team.

WHAT I DO

Backend

PHP, Laravel, REST APIs, Node.js

Frontend

HTML, CSS, JavaScript, Tailwind, Bootstrap

Databases

MySQL, PostgreSQL, MongoDB, Redis

Infrastructure

Docker, GitLab CI, Deployer, RabbitMQ

Also

System design, legacy rewrites, audits, optimisation, consulting
